SUMMARY

Full-stack developer with 2+ years shipping mobile, web and backend for apps with **55K+ Play Store downloads**: building **MatchBD** and **Kindred** at Cookspace; previously led Munchies' **Go + PostgreSQL** rewrite (**269K+ orders**).

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Go, SQL, Python, Dart
- **Backend:** Node.js, NestJS, Express, Go (GORM), FastAPI, REST APIs, BullMQ, Redis, TypeORM, Drizzle, Prisma
- **Data:** PostgreSQL (PostGIS, pg_trgm, RLS), Supabase (Auth, Realtime), MongoDB, Firebase
- **Mobile & Frontend:** React Native, Expo, Flutter, React, Next.js, Tailwind CSS, ShadCN UI, React Query, Zustand
- **DevOps, Testing & AI:** Docker, GitHub Actions, Xcode Cloud, AWS, Playwright, Jest, Vitest · OpenAI, Gemini, Vapi, MCP

WORK EXPERIENCE

Full Stack Software Developer — Cookspace Technologies
Mar 2026 – Present · Dhaka, Bangladesh

MatchBD · *matrimony platform, 5K+ downloads, 4.5★ on Google Play · NestJS API with 347 endpoints, 51-page admin*

- Primary mobile engineer on the **React Native/Expo** app (41 screens): OTP auth, NID verification, swipe discovery and live chat on **Supabase Realtime** with FCM push; wrote 80 of its 168 test files.
- Integrated the **Nagad** payment gateway end to end (RSA-signed NestJS client, server-verified settlement, in-app checkout).
- Hardened security and compliance: refresh-token rotation with replay detection, deny-by-default rate limiting, BullMQ retention jobs; automated iOS (Xcode Cloud) and Android releases.

Kindred · *AI matchmaking app · Expo app (52 screens), NestJS API (158 endpoints), Python AI compatibility engine*

- Bootstrapped the Expo app: design system, OTP sign-in, NID and selfie KYC, Big Five personality onboarding.
- Platform runs an **AI compatibility engine** (FastAPI: deterministic scoring + LLM analyst with research-cited insights) as BullMQ jobs; built the admin tooling to monitor and retry AI jobs.
- Designed and built the **trust-and-safety system** across API, app and admin: report, block, suspensions and bans.
- Built an **MCP server** (16 tools) that lets AI coding agents query staging logs, deploys, queues and LLM usage, plus an e2e harness (11 suites) gating every PR.

Software Engineer (Level 01 → Level 02) — Munchies
*May 2024 – Sep 2026 · Dhaka, Bangladesh · Late-night food delivery: **50K+ downloads** on Google Play, 650+ restaurants*

- Led the platform rewrite from Parse/MongoDB to **Go + PostgreSQL (Supabase)**: **388 API endpoints**, a 100-page React admin and a Next.js storefront; Python ETL migrated **269K+ orders**, **480K+ order items** and **44K+ bKash payments**.
- Backed the rewrite with **332 Go test files**, **~500 Playwright e2e tests** and legacy-parity audits.
- Replaced a paid geocoding API with in-house address search over OpenStreetMap data (**PostGIS + pg_trgm**, 139K places, Redis cache); raised restaurant address matches from **38% to 90%**.
- Built a **GitHub Actions → Google Play** pipeline for the 50K+-download Flutter app; added a double-refund guard and a unique index that ended duplicate payouts.
- On the earlier Node.js/NestJS stack, improved platform performance by **40%** with Redis caching and PostgreSQL query optimization. Promoted to Level 02 within 10 months; mentored **4 junior engineers**.

Software Engineer — Norton-Gauss
Feb 2025 – Mar 2026 · Full-time · Remote

- Built and scaled REST APIs integrating network infrastructure services (DAS, ERRCS, COMBA) via the Zabbix API.
- Wrote end-to-end network automation in **Playwright** scaled to **100+ parallel executions**, replacing manual operator work.
- Improved backend performance by **50%** through message-queue offloading, database indexing and API-response caching.

PROJECTS

Prepwise — AI-Powered Mock Interview Platform **Live Link | Github Repo**

- Real-time voice AI interviewer (**Vapi** + **Google Gemini**) that runs role-specific interviews and gives structured feedback.

EDUCATION & ACHIEVEMENTS

B.Sc. in Computer Science & Engineering — United International University · 2020 – 2025

- **1st Runner-Up**, Final Year Design Project · **3rd Runner-Up**, Database Project — UIU CSE Project Show
- **Languages:** Bangla, English, Hindi, Urdu
